## Suspects In Young Girl's Murder Are Safe In Jail At Wausau--All Quiet.

# INQUEST IS BEING HELD TODAY

## Two Men Arrested On Suspicion Tell Story Of How They Happened To Be In Vicinity--Both Claim To Have Been Going West.

[SPECIAL TO THE GAZETTE.]  
Wausau, Wis., July 2.—Apparently all talk of lynching the two suspects held for the death of Jennie Rehlke, the seventeen-year-old girl assaulted and murdered yesterday near the hamlet of Stratford has died down. The inquest is being held here this afternoon and the leading spirits in the proposed lynching have apparently given up their plans.  
Irvin Bartlett, one of the tramps under arrest charged with the Rehlke girls murder, said this morning "My home is in Nashville, Tenn. I recently worked in Kansas City, Mo., as a member of the leather workers union and also have worked in Texas and at Shreveport, La. I met James Mackey, the other man accused, at Eland Junction, on Saturday last, when we were put off the train and walked to Wausau. I was in Fernwood at the time of the crime and never saw the girl." Mackey tells the same story adding they were going to Minnesota to get farm jobs.  
The autopsy was held this morning over the body of seventeen year old victim and it showed finger marks on the throat and one rib broken. The inquest was held this afternoon. The authorities are hiding the evidence fearing mob law.  
At Stratford, where the girl lived, the whole town is gathered and many went to Wausau to storm the jail and get the accused men to hang them.

# MILWAUKEE'S SANE BUT NOISY FOURTH

## Thirty Thousand Dollars' Worth of Fireworks Will Be Set Off on July 4th.

[SPECIAL TO THE GAZETTE.]  
Milwaukee, Wis., June 2.—Milwaukee's youth expects to spend about \$30,000 for fireworks before July 4, 1907, has passed. Mayor. Sherbo Becker will lead the enthusiasm in the celebration of a sane but noisy fourth.

Some novelties in fireworks have appeared, but the supplies of them are small. One is the "shooting match" which looks like a parlor match but goes off about a dozen times with the report of a good-sized revolver. "Teddy Bear balloons" are another catchy novelty. Fire-crackers this year are as always. Prices all around are from 20 to 30 per cent higher than last year.

Out in the state there will be the usual celebrations and a few special features. At Two Rivers the life saving crew will give an exhibition, with the aid of a schooner anchored about 700 feet off shore. At Green Bay all will be made ready for the state turners. Clinton will have a home-coming. This will last until July 6.  
Menasha will celebrate the hundredth birthday of Bernard Krause, a pioneer and native of Bohemia. His birthday really is the 6th. The Indians of Court D'Oreilles, in northwestern Wisconsin will star a big pow wow. At Manitowoc the state convention of United Spanish War Veterans will be well under way. Whitewater will have a home-coming, closing July 8.  
In Milwaukee Mayor Becker has collected \$1,000 for fireworks, and one novelty at least will be the fact that all barbers will not work through the entire day. Mayor Becker refused any number of invitations to speak elsewhere.

# PET BUCK DEER IS DEAD OF LOCKJAW

## Animal Which Recently Escaped from Fred Gehri's Premises Succumb- ed This Morning.

Lockjaw, resulting from barbed wire wounds received when the animal recently escaped from its pasture and wandered over the towns of Rock and La Prairie, caused the death this morning of Fred Gehri's pet buck deer. The animal became very sick yesterday and Dr. George B. Little was called. Nothing could be done to save the deer and the end came to-day. This animal is the same which appeared near the golf links two weeks ago and startled H. G. Carter and A. P. Burnham who were at play near hole No. 4 at the time. It was later captured in the town of Rock and returned to the owner at 67 Chatham street.

Mechanicsburg was popularly known in its early years as "Pinchut." Later it was called Stoufferstown, in honor of Henry Stouffer, who was one of the first settlers and the owner of considerable land in the vicinity. Exercises appropriate to the occasion were held in the auditorium, Senator Stephen B. Elkins presiding. The speakers included Governor Dawson of West Virginia, Governor Swann of Virginia, and President Tucker of the exposition. Another feature of the program was the formal opening of the West Virginia State building, one of the most substantial and attractive of the state buildings at the exposition. The structure is colonial in style and occupies a place of prominence on the boulevard, overlooking Hampton Roads. Among the relics of colonial times displayed in the building is the map used by General Washington on the journey to the French on the upper Ohio in 1752. There are seventeen makes of cars in the race and thirty-seven starters. "Epidemic" Among Wyoming Sheep.

Cheyenne, Wyo., July 2.—The board of sheep commissioners of Wyoming has appealed to the bureau of animal industry of the United States to assist the Wyoming stockmasters in investigating and stamping out an epidemic which is killing thousands of sheep and threatening the sheep industry of the entire state. It is believed the trouble is caused by a small fly which enters the nostrils of the lambs.

## ..Forty Years Ago..

Janesville Daily Gazette. Tuesday, July 2, 1867.—The Weather.—We have no apology for the weather, the thermometer indicating 95 in the shade.

Accident at the Driving Park.—Young Allison, one of the riders in the race this afternoon, was thrown from his horse and had his leg broken.

Curious Larceny.—Some enterprising residents of "the Patch" stole a train of freight cars absolutely poor of every article of iron that could be got off, the other night. A constable, made a search yesterday and found in one car a nail keg full of nuts besides a quantities of gear from the brakes. The train was so demoralized by the theft that it took over a day to repair it before it could be moved.

Young Men's Association.—The de-

bate this evening will be unusually interesting, as will be seen by the following resolution:

Resolved, That the mode in which the Fourth of July is generally celebrated is wrong, and ought to be discouraged.

Affirmative, Wm. Smith, Jr., and Geo. Chandler. Negative, Pilyr Norcross and Henry Adler. The public are invited to attend.

Burglary.—Early this morning the house of Mr. Nath'l Stimson, corner of Milwaukee and East streets, was entered by a burglar through the dining room window. The property stolen consists of fifteen napkin rings, (mostly silver) belonging to Mr. Stimson and the boarders. The individual losers are as follows: Messrs. Stimson, Lockwood, Webb, and Ruger, each two rings; Rev. Wood, three rings; Messrs. Mosely, Crosby, Underwood and Miss Boyd, each one ring.

Not His Dog.

"I think a dog has a good deal of intelligence," said the man with the spaniel, "but I am not as bad as Browne. He actually had the cheek to tell me that he was thinking of studying German, so that he could talk to his wife without the dog understanding every word he said."

If They Only Would.

If farmers could and would drive horses attached to wagons through the country districts at the rate of 40 or 50 miles an hour, occasionally knocking an auto over an embankment, or making it run away, what a howl the auto owners would make!—Franklin News.

Love and the Man.

Men are delighted to be told that they are never absent from the thoughts of their sweethearts, but the husband finds this consciousness a trifle wearing. As bad as the clinging vine is the woman who makes her devotion too incessant. She is never tactful, never conscious that he wants to be alone occasionally, never capable of making herself and her affections a novelty to him. And this is a fatal error on the part of any woman.—Exchange.

Life's Keyboard.

Our life is a keyboard. The Master's fingers will sweep over it, and a weary world will catch notes of melody as we pass along. The life that is in tune with God is keyed to the note of love.—J. R. Miller.

### SUMMARY OF CROP FACTORS

Taking weather conditions, field work, the present state of growth of crops, the progress of harvest, the commercial movements and the speculative position into account, it is probable that the market as it stands today may continue to be maintained until further proof of conditions at home and abroad demonstrates still more optimistic views as to the future. Undoubtedly, apart from a half dozen wheat states, the grain crops are in an encouraging state of progress. The same may be said of cotton. But there are too many risks ahead to be more definite at the close of the fiscal year.

Domestic conditions during the last week of June have been favorable to the recovery of crops of both winter and spring variety, on account of the more open weather and the better distribution of sunshine and rainfall. Nevertheless the times and places at which the temperature was 70 and above have, as a rule, been in the minority in the western and southern sections. For this reason some careful judges are still inclined to the view that both in cotton and grain improvements are yet rather on the surface than fundamental.

Nevertheless detailed examinations show that crops are well rooted as a result of the cool May, and have over come most of the disadvantage of lateness from the warmer weeks of June. Hence good reports come in from the central and eastern states of the Mississippi valley. The northwest is strong in growing prospects and the south, with cotton as the main feature, shows improvement in the percentage of condition of that crop in comparison with earlier reports. Consequently, taking crop conditions as a whole, the progress to the end of June has offset much if not most of the disadvantages of a bad start.

The features of field work during the last week included winter wheat harvesting, progress of haying and the second working of the corn fields, in by far the greater proportion of the country. The clearing of the cotton fields of grass has put that crop in a good state of culture. Complaints of weedy conditions are rather rare. In spots, only the need of rainfall has been reported from the grain and cotton sections.

The good roads government expert who was here recently said that he could "place" Janesville's "macadam streets in excellent condition at a small cost by use of a good top-dressing of crushed pebbles; and the judicious use of the street roller. Why not look into this plan. There is no better quality of pebbles in the country than right here in Janesville.

The move to make the Janesville Homes beautiful for the Fourth and the offering of prizes to stimulate the idea, promises to do much towards making the Fourth a success. With good weather the largest crowds in the history of the city will be present.

Clinton's Home-Coming promises to be well attended by Janesville people July 5th. There is much of interest to take former residents back to their native town and Clinton can claim many Janesville residents as former citizens.

Governor Davidson wants to be the real Governor and appoint whom he wants for superintendent of public

property. Lt. Governor Connor, the King-maker, wants to have his say as to the matter.

The Maxwell Automobile factory, which might have come to Janesville and located a factory site here, is described in the Automobile magazines as one of the largest concerns in the country.

When those arches for the electric lights are really strung along Main and Milwaukee streets it would be a good thing to keep them up at least for the rest of the summer.

It would appear as though Mr. Sparling, a professor at the state University, who has been secretary of the state civil service board, is not to be reappointed.

City Marshal Appleby has wisely issued an order that no confetti shall be used on the Fourth. He might even extend his order to ticklers and snap-back balls.

One Illinois Congressman claims that Spooner is the only man beside Roosevelt who can combine all elements of the republican party as President.

Dr. Scoville has nearly completed his work in Janesville and will soon leave. His place will be taken by the state Sunday school convention.

The Fourth is still one day off and the small boy can hardly wait for the time to come when he can shoot fire-crackers as much as he wants to.

If the weather man will please be good and make the weather nice and warm for the Fourth his bad behavior last spring will be forgiven.

Rock county farmers are not complaining as much as some districts over the bad spring but its effects will be felt unless the fall is late.

When that biggest balloon in America goes up watch the small boys and lots of big ones crane their necks to see the parachute drop.

The vetos that are going back to the legislature are frequent and Governor Davidson does not mince words when he sends them.

If anyone wants to be very popular in civic life let him be warned not to be placed upon a fourth of July committee.

Kansas claimed all its crops were ruined and now it begins its howls for workers to harvest it.

### ACCIDENT CAUSED BY COASTER BRAKE

Worn Apparatus Failed to Hold Bicycle and Edward Fleming Was Thrown and Injured.

As the result of an aged coaster brake failing to perform its duty Edward Fleming of 2 Bostwick avenue, a clerk at the McCue & Buss drug store, was thrown from a bicycle last evening, sustained a fracture of the little finger on his left hand and suffered numerous bruises and abrasions about his arm and shoulder. He had borrowed a wheel to make quick time in going home to supper and returning. In coasting down a narrow, rocky path on Bostwick avenue, near the end of Racine street, he applied the brake as he neared a sharp turn. The apparatus being old and worn did not check the speed of the bicycle and Fleming was thrown against the rock cliff along the path. The injuries will incapacitate him for work for a time.

**'Sued for \$408 00 Dental Bill'**

This morning's Chicago papers give particulars of a case in court where a dentist is suing a patient for \$408 for filling 14 teeth.

He brought in a lot of brother dentists who swore his charges were reasonable and that he might have charged anywhere from \$300 to \$500 for the work and it would have been all fair.

That's just it. Some dentists charge all they think your purse will stand. That's where Dr. Richards is different.

He has fixed a fair price which will give him a living margin on his work. He makes gold crowns for \$5.00 each and warrants them the same as you are paying \$10.00 elsewhere.

The difference in price is all in the mind of the dentist you employ.

Not in the crown. As a consequence, Dr. Richards is putting on as high as 55 cents a month.

\$5 is prohibitive but most any one feels that a tooth is worth \$5 saved to them for years of good service.

If you have him do your work it will be done right.

**TWO KINDS OF  
MILK...**

OUR KIND.

**RICHNESS**—All milk accepted at our dairy must reach the high standard set by us for richness in butter fat. If it falls below this standard it is rejected.

**PURITY**—Milk as it arrives at our plant is passed through a fine quartz filter under pressure, which removes all sediment and most of the germ life prevalent in all milk.

**PASTEURIZATION**—This means that every remaining form of germ life in the milk is destroyed by a simple process of heating it to a high temperature and then quickly cooling. This is accomplished without changing of flavor or other properties of the milk.

**OTHER KINDS.**  
There are many of them. We shall be pleased to serve you with ours.

**MRS. CARLOS BROWN  
DIED LAST NIGHT**

Came to Janesville, and Had Resided Here Since—Celebrated Golden Wedding in 1899.

Mrs. Lucia A. Ross Brown, wife of Carlos Brown, passed away at 9:15 o'clock last evening at her home, 109 Fourth avenue. Her last illness extended over a period of three months and during that time she suffered much, though her daughter-in-law, Mrs. George H. Fox, and others cared for her most tenderly. Mrs. Brown was born in Middleton, Vermont, February 19, 1830, and was married there to Mr. Brown on the seventeenth of October, 1849. After a

THE LATE MRS. CARLOS BROWN

short honeymoon trip the young couple departed for Wisconsin, which was then in the "far west." Two weeks were consumed in going from Vermont to Milwaukee by water and rail. From there they proceeded to Beloit and after visiting friends in that village came to Janesville, which has always been their home since. For the past fifty-three years they lived at 109 Fourth avenue. Two sons, Walter R. and Edward J., were born to Mr. and Mrs. Brown, but both preceded their mother to the world beyond. In 1899 Mr. and Mrs. Brown celebrated their golden wedding and the present ending of their long journey of wedded happiness is an affliction and deep sorrow to Mr. Brown. Mrs. Brown had been a member of the Janesville Baptist church for forty-five years and her demise is a loss to the society. The funeral will be held from the home Wednesday afternoon at two o'clock and burial will be in Oak Hill cemetery.

VIOLIN FOR SONG**

Prof. W. T. Thiele Secured Stradivarius Instrument for Ten Dollars.

While visiting in Whitewater last week Prof. W. T. Thiele discovered a Stradivarius violin and was able to purchase it for ten dollars. It was in the hands of a visitor in the city and he not recognizing the instrument's value was willing to dispose of it for a song. Mr. Thiele was first attracted by the wonderful mellowness of the tone, and after trying the violin set about to close up the cracks and openings in the box, the different parts having warped out of shape. In making the repairs he discovered the name Stradivarius and he believes the instrument is genuine. In shape the box is different from the ordinary style and is so scratched that it is no longer beautiful to the eye.

## Sleep And Rest

Every movement of the body consumes energy. So does mental effort. Energy is supplied by the nerves. It follows that physical or mental exhaustion simply means an over-draft on the nerves. Nature restores energy through rest and sleep. You cannot sleep with tired nerves. Dr. Miles' Nervine soothes the irritation and restores nervous energy.

"Although I have lived nearly 78 years, I have stood up against countless months for publication, but the unequalled experience of Dr. Miles' Restorative Nervine, as a medicine for nervousness, insensitiveness by long residence in a high altitude compels me to recognize its superiority over every other medicine I have ever used for nervousness and sleeplessness. I feel sure that the Nervine is free from injurious opiate found in most medicines, and can conscientiously recommend it to the aged and nervous." MRS. W. H. FRETSMAN, Colorado Springs, Colo.

**PEDDLING A BLACK BEAR.**

Maine Sailor Offers One That Can Churn and Is House Broken.

Three sailors walked into the office of Director Smith of the Central Park menagerie yesterday and wanted to know what was the market price for black bears, says the New York Sun.

The spokesman introduced himself as Moses Nash, able seaman of the good schooner Mary E. Pennell, which hails from Edison, Me., and is now lying in Whale's Creek, Brooklyn. The A. D. said he had a fine black bear one year and four months old which he would like to sell.

"Is it a tame one?" the director asked.

"Tame? Gosh all hemlock! He's the tamest and smartest bear in the whole state of Maine. Why, I leave him home to keep marm company, he's that companionable, when I go to sea. And intelligent! Why, marm gets him to churn the butter for her every Monday when she's getting ready to go to Harrington. He just loves to work the machine and he gets a good drink of buttermilk for doing so."

The director asked how he got this very intelligent bear. Nash explained that he had raised it on a bottle from the time it was an hour or so old.

Nash said the bear was as gentle as a house dog and would make a fine pet. He didn't like to part with him, but he needed the money.

Mr. Smith said he had a full supply of bears and couldn't make a dicker, and the Maine sailors went away disappointed.

**CAN FORETELL THE WEATHER.**

Scientist Thinks Animals' and Birds Have That Power.

Are the tree toads, swallows, and fishes trustworthy barometers? Prof. Robert Leachmayer, of the University of Prague, assures the world that many species of animals probably sense electric waves emanating from distant storms, the local electric tension, the ionizing of the atmosphere, the permeability of higher strata to light in small waves, and the atmospheric pressure, as well as moisture and temperature, and by certain combinations of such perceptions are reflexively led to special actions that stand in a casual relation to the coming weather. The question whether the high or low flight respectively of the insects and the behavior of the fishes, tree frogs, and swallows standing in connection therewith can be used as weather indications seems to him to be not finally answered. So far as the scientific investigations permit a conclusion no connection exists indeed, but since an instinctive accommodation of the conduct of the insects to the coming weather is possible and undoubtedly would be extremely advantageous to them, he deems it nevertheless not impossible that such a one exists in fact.

**Pen Economy.**

The merchant before filling his inkwell dropped in two or three old pens and poured the writing fluid upon them. "Thus," he said, "I practice pen economy, prolonging three or four times the life of all my pens. You see, the corrosive power of the ink, which is immensely strong, vents itself on the old pens kept in the well and has little or no strength left wherewith to attack the pen I have in use. Try this scheme, young man, and you will find that your pens will practically never wear out."
